Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 June 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 6-9 and 11-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 6-8 and 11-15 is/are rejected.
- 7) ☒ Claim(s) 9 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

1. The following action is taken in view of the amendment filed 6/27/03 and subsequent updated search.

Information Disclosure Statement

2. The information disclosure statement filed 6/27/03 has been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 6-8 and 11-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Akagi et al.

Akagi et al. teaches a magnetic recorder that includes a storage medium (10) that includes position information that defines real tracks that are eccentric to the axis of rotation of the medium (servo patterns as disclosed in column 5, lines 25-30), a

Art Unit: 2651

transducer (16) that follows virtual tracks (figure 1a and column 5, lines 35-42) that are concentric to the axis of rotation of the medium and eccentric to the real tracks. This teaching satisfies the limitations of claim 11. As the disk rotates, the head follows a virtual track and read servo information at the crossing points between the virtual tracks and the eccentric tracks, satisfying the limitations of claim 12. As taught by column 5, line 49 the head can record data and since it follows the virtual tracks it records information therein satisfying the limitations of claim 13. The operation of the device taught by Akagi et al. to remove RRO components is shown by figure 4 and corresponding disclosure satisfying the limitations of claim 14. Claim 15 although set forth in apparatus form, sets forth substantially the same limitations as discussed above and therefor rejected for similar reasons. It is noted that the output lead reads on any portion of the hardware that is used to carry the position error signal that is used to control the position of the head. Claim 6 sets forth a method that includes forming a compensation equation, generating a compensation signal, and injecting the compensation signal. These claimed features are satisfied by the operation shown in figure 4, specifically element 41 includes a calculation set that must have a equation that is used to form a compensation signal that is added with a position error signal to form a position error on a virtual track. The additional limitations as set forth in claim 7 are satisfied by the operation of elements 43 and 41 as shown in figure 4 along with the corresponding disclosure. The limitations of claim 8 are taught by column 5, lines 28-52.

Allowable Subject Matter

Art Unit: 2651

5. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The claimed method as set forth in claim 9/6 that measures a reference position for a plurality of heads and establishing a reference virtual track at each reference position as set forth is neither taught by nor an obvious variation of the art of record.

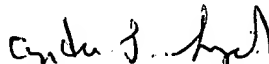

Response to Arguments

7. Applicant's arguments with respect to claims 6-9 and 11-15 have been considered but are moot in view of the new ground(s) of rejection.
